

- Use a suitable glue for vinyl wallpaper on non-woven material.
- WARNING:** Before you start installing the wallpaper, check if the wallpaper corresponds to your order. Compare the shade of the sheets with each other and check their number.
- All customer complaints reported AFTER gluing wallpaper to the wall won't be considered.

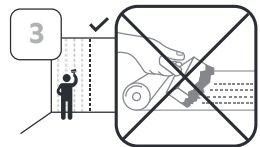

1. Marking the horizontal lines of gluing

Firstly, spread the stripes of wallpaper, to arrange the full picture. Plan the order of montage. We start the assembly from designating the place where there are vertical lines. Do not mark it permanently, use laser measurer. During planning the assemblage process, count the size of additional wallpaper stock.

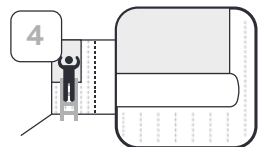

2. Designation of verticals gluing line

Before applying further stripes of the photo wallpaper we mark vertical lines along the entire height walls. So that it does not happen during assembly to be moved. Remember: do not mark it permanently.

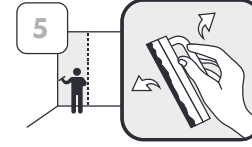

3. Spreading the glue

Grease the wall surface with glue, spreading it with a brush - to obtain a uniform layer. Important: we do not apply glue on the surface of the photo wallpaper!

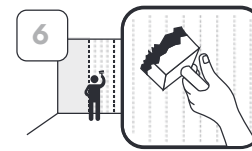

4. Gluing photo wallpapers

We put a strip of wallpaper on the surface with glue, slowly and gently roll it out by sticking it all along.

5. Smoothing out inequalities

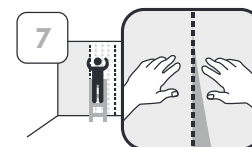

Smooth the surface of the wallpaper with a roller, removing unnecessary air bubbles.

6. Gluing subsequent stripes of the photo wallpaper

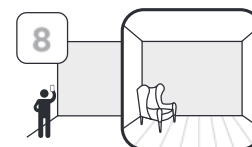

Repeat steps 1-5 for the next ones stripes of wall murals until they all fit on the wall surface.

Important: with a sponge or cloth (slightly moistened water), you can gently remove any excess glue.

7. Adjusting the photo wallpaper

Pay particular attention to the fit graphics (all photo wallpaper strips are prepared for butt jointing). Make sure to properly press the cracks between the stripes with a roller. Cut off the excess wallpaper stock.

8. Share

The mural is glued on, it remains to finish arrange and enjoy the beautiful interior! We will be pleased to receive photos of the finished arrangement.*
